Network Profit Margin

Network Load Factor

month of December; a major part of this was obtained from the passengers travelling in Economic Class.

2. The highest profit margin was obtained from the route of DEL - JFK.

3. The highest RASK was found to be on the route DEL- IXC.

4. The online booking channel generates the most revenue and the maximum percentage of ancillary was generated by Call Centre

5. The company can increase revenue by increasing the frequency of international flights

6. Pricing could be increased within a considerable range to cover the profit margin and cancelling loss making routes or reconstructing them.
